

## **LITTLE FOXES 19**

### **SONG OF SOLOMON 2:15**

15 Take us the foxes, the little foxes, that spoil the vines: for our vines have tender grapes.

### **PSALM 42:2**

2 My soul **thirsteth** for God, for the living God: when shall I come and appear before God?

### **[STOP]**

THE.SEED.OF.DISCREPANCY\_ PHOENIX.AZ V-12 N-5 MONDAY\_65-0118

85 Notice, He is that Rose of Sharon, that sweet-smelling Savor, **the Anointing upon His people**. You cannot come before Him with any creed, any other thing, but anointed with that Rose of Sharon, the Word. He also is the Lily of the Valley.

86 Now, how do you get opium? You get opium when you take a lily and squeeze it out, you get the opium. Doctors use it in their laboratories. Take a man that's nervous and flusterated, or a woman, she feels like she's going to go crazy, she's walking the floor and screaming, she's in hysterics, a doctor will take a little of his lily opium and push it into her arm or vein somewhere, or his, and they quieten down. It's all over for a while. But just as soon as that opium dies out, here they come again, worse than they ever was.

THE.SEED.OF.DISCREPANCY\_ PHOENIX.AZ V-12 N-5 MONDAY\_65-0118

87 But I'll tell you, friends, that's only a type of the genuine Opium from the Lily of the Valley that I know of. **He is the Lily of the Valley. He was squeezed out on Calvary.** He was wounded for our transgressions, with His stripes we were healed. In that, that squeezing out of the flowers, He was a Flower. He was the greatest Flower that ever growed, was this Lily of the Valley, and this great Rose of Sharon.....

## **Acetylcholine:**

Among other things, acetylcholine appears to play an important role in learning and memory. The neurons that produce this neurotransmitter – cholinergic neurons – are found in several regions of the brain, where, when stimulated, they release their stores of neurotransmitter onto waiting neurons.

Nicotinic receptors, named after one of their most potent activators, nicotine (the reason cigarettes are so addictive), allow ions to quickly pass through them when either acetylcholine or nicotine binds to them. Muscarinic receptors (from muscarine, a receptor stimulant and poison extracted from certain mushrooms) act on a slower time frame than the nicotinic receptors. One of the most common blockers of the muscarinic receptors is atropine, a natural compound found in certain plants, such as deadly nightshade or mandrake.

## **Cannabinoids: such as is in marijuana**

There's no doubt that the brain responds to cannabis – the question is why would the brain evolve the ability to bind to this drug? In fact, the active component of the cannabis plant (tetrahydrocannabinol – THC) is a natural mimic of compounds that the human body actually makes on its own.

This group of THC-like chemicals made within the body are endocannabinoids. These are fatty chemicals able to move freely between cells until they find their receptors – CB1 and CB2. Once these are activated, a number of pathways are activated, resulting in a diverse array of effects, from reduced experience of pain to movement of the digestive tract, as well as having an effect on mood.

## **Opioids: Poppy-derived painkilling**

The colorful poppy is the source of the alkaloid drug, opium (an opiate – literally meaning ‘poppy tears’), a property that led to the eventual discovery of the numerous opioid receptors that bind such compounds within the nervous system. One well-known opiate commonly used today for the treatment of severe pain is morphine (after Morpheus, the Greek god of dreams).

Distributed throughout the nervous system, the opioid receptors, OP1–OP4, are involved in all of the calming effects we might expect, such as pain relief and reduction in anxiety – but these are taken to extremes by recreational drugs such as heroin. The natural partners to the opioid receptors are the endorphins, released during certain activities, such as running (they’re thought to be responsible for the ‘runner’s high’), pain and others.

Dopamine, Serotonin, Oxytocin, and Endorphins are the quartet responsible for your happiness. Many situations can trigger these neurotransmitters.

**Endorphin** is the brain's painkiller, and **it is 3 times more potent than morphine**. Scientific research over the last several decades has led to the revolutionary discovery of opiate-like chemicals in the body that associate with opiate specific receptors in the brain and spinal cord,

Being in a positive state has significant impact on your motivation, productivity, and wellbeing.

Endorphins are released in response to pain and stress, and helps to alleviate anxiety. The surging “second wind” and euphoric “runners high” when running are a result of endorphins. Similar to morphine, it acts as an analgesic and sedative, diminishing your [perception of pain](#).

‘endorphins’ act in the brain as natural pain relievers. Their action is imitated by heroin and morphine, also alcohol.

[Aromatherapies](#): the smell of vanilla and lavender has been linked with the production of endorphins. Studies have shown that [dark chocolate](#) and spicy foods will cause your brain to release endorphins. Keep some scented oils and dark chocolate at your desk for a quick endorphin boost.

## **Oxytocin**

The release of oxytocin creates intimacy, trust, and strengthens relationships. Animals will reject their offspring when the release of oxytocin [is blocked](#). Oxytocin increases [fidelity](#); men in monogamous relationships who were given a boost of oxytocin interacted with single women at a greater physical distance than men who weren’t given any oxytocin. Oxytocin is the glue that binds together healthy relationships.

Often referred to as “the cuddle hormone,” a simple way to keep oxytocin flowing is to give someone a hug. [Dr. Paul Zak](#) explains that inter-personal touch not only raises oxytocin, but reduces cardiovascular stress and improves the immune system. Rather than just a hand-shake, go in for the hug. Dr. Zak recommends eight hugs each day.

Giving someone [a gift](#), will also cause their oxytocin levels rise. You can strengthen work and personal relationships through a simple birthday or anniversary gift.

FAITH.WITHOUT.WORKS.IS.DEAD\_ CHICAGO.IL SATURDAY\_ 53-0905

E-72 All right. Bring the lady. You believe with all your heart? Believe Jesus Christ makes you well right now? Go, thanking God, saying "Praise You, Lord. Praise You." **Don't never have no negative testimony; testify positive.** "Jesus has healed me, and I'm well." Go and you will receive your healing. Say, "Praise be to God."

THE.POSITION.OF.A.BELIEVER.IN.CHRIST\_ PHOENIX.AZ SUNDAY\_ 55-0227A

E-25.....we want to change from hope today to positive faith. **And there's only one way we can get positive faith: that's by positive thinking of positive things.**

Dr. Ravinder Mamtani in New York, who has been leading the research in this field of positive thoughts, says "In many cases if you have a chronic disease or illness, calming the mind will calm the disease or illness."

Calming the mind means getting rid of the negative thinking, being optimistic, and focusing on the positive aspects do that and you'll heal yourself.

All you have to do is learn how to be calm, control, and direct your mind so that you have a positive belief system and remain optimistic and you really do change your life.

Dr. Mamtani went on to find that patients who had or who developed a positive attitude and positive feelings had better outcomes and were more likely to rebound from medical setbacks.

## **So apply positive thinking.**

Be optimistic.

Focus on the positive aspects.

Direct your mind and subconscious mind to help you get better and enjoy your life.

By having this positive attitude, by getting your mind and subconscious mind to be more positive and optimistic you attract more positive situations into your life.

You naturally and easily begin to have more success and achieve your goals.

So begin directing your mind and subconscious mind to help you heal yourself.

## **So if positive thinking improves your health, does negative thinking make things worse?**

Doctors say a negative attitude or negative feelings and negative thinking lead to major setbacks and make any sickness worse. "There is now evidence for example, that hopelessness accelerates heart disease and increases mortality." Says Dr. Mamtani. Negative thinking increases the chances of heart failure and leads to an early death.

"The mind and the body's defense system communicate and work with each other." Said Dr. Mamtani.

That's why you really need to put an end to negative thinking. It does you no good and only makes your life worse.

There's scientific proof that negative thinking makes life worse, leads to greater struggle and shortens your life span.

So start getting rid of the negative thinking today.

Fill your mind with positive thinking and a positive attitude.

There's also proof that positive thinking, an optimistic mind and a positive attitude leads to better health, a longer life and greater success.

### **Stop negative thinking.**

Begin to create and maintain a positive attitude.  
Train your mind to focus on positive aspects of your life.

To develop an optimistic and positive mind and subconscious mind start changing your beliefs and the way you see things.

Focus on how things can get better.  
Believe that you can succeed.

Get rid of negative thinking by tracking your thoughts and eliminating the negative thoughts and beliefs.

Change them to positive thoughts and positive beliefs.

The changes begin when your subconscious mind begins to pick up the new belief system. It then begins to guide you to the situations, and opportunities to help you achieve your goals and improve your health. At the same time you begin to calm the mind and the subconscious begins to calm the body leading to better health.

When your mind begins to automatically focus on what you want and stops being negative you will begin to see dramatic changes.

Eliminate negative thinking.

Create a new positive, optimistic attitude.

PERSEVERANT\_ CHICAGO.IL V-21 N-4 FRIDAY\_ 63-0802

136.....When she arrived at Jesus, then Jesus said He was not sent to her race. Oh, my!

137 **And another thing, He turned around and called her race of people nothing but a bunch of dogs.** "I'm not sent, only to the lost sheep of the children of Israel." That didn't stop her. She was still perseverant. And said, "Besides, it's not meet for Me to take the children's bread and give it to you dogs." Still she was perseverant.

138 Oh, I like that. Still she held on. Amen. I like that. Hold onto it! She was perseverant. She was not a hotbed plant, had to be babied. No, sir. She was not a hybrid article, like big part of the crop today. You didn't have to beg her and say, "Now, sister, I'll tell you, I would encourage you to go on, because..." **No, sir, there wasn't nobody there to encourage her, but even Jesus Himself tried to discourage her.** Whew! Glory! Now I feel like a holy-roller, sure enough. **Even Christ Himself standing there, trying to discourage her, but she held on.** Amen. Perseverant! She had arrived at something. She knew it.

PERSEVERANT\_ CHICAGO.IL V-21 N-4 FRIDAY\_ 63-0802

139 **What if He'd call you a dog, and your race, a bunch of dogs?** "You bunch of Chicagoans, you--you bunch of Methodists, you Presbyterians, I wasn't even sent to you. You're nothing but a bunch of hypocrites, anyhow." Whew! My! You would stick your nose up and turn out that door. **See? Why? You've never had faith, to begin with.** You're a hybrid, a hotbed plant that has to be sprayed all the time.

140 **Not her! No. Something happened, faith had anchored.** She is not going to be defeated. Amen. There you are. No matter what the rest done, what the rest said; she is not going to be defeated. No, sir. **Even Jesus, Hissself, couldn't discourage her. Amen.**

PERSEVERANCE\_ NY.NY V-18 N-12 SATURDAY\_ 63-1116E

157 **Now she got right up to the very God Himself. And He ignored her.** And she run after Him, crying. She was persistent. "Lord, help me," she said. She worshiped Him, said, "Help me!"

Listen at that rebuke. **"I'm not sent to your race." Oh, my!**

158 Then a lot of them would have got up, said, "Well, I guess He wasn't sent to us. This revival don't. Guess I'll go away."

See, **Jesus knowed she had that kind of faith. See?**

159 And another thing He said, "Your race is only a bunch of dogs." Whew! My!

160 Don't talk like that to the modern Pentecostals. Oh! You say that, they say, "Well, I'll just leave this bunch and go join the Assemblies. And the Assemblies say it to me, I'll go to the others, and the others, and the others, you see."

**But not that woman. She had faith.**

161 Said, "Your... I wasn't sent to you. I wasn't sent to your race. And, besides, you're nothing but a bunch of dogs. It's not meet for Me to take the children's bread here, and cast it to you bunch of dogs." Oh, my!

PERSEVERANCE\_ NY.NY V-18 N-12 SATURDAY\_ 63-1116E

162 **That don't stop faith. Faith is still there, just as fresh as it ever was. What does faith admit? The truth.** She said, "That's the truth, Lord." Oh, my! See how little you can get, not how big you can get. Faith makes you little. Notice, still she was perseverant.

163 Yet, He wouldn't pay no attention to her. He ignored her.

**And finally she got in His way and He couldn't get around her,** and then He told her, said, "I'm not sent to you, and your... to your race. And your race is nothing but a bunch of dogs. And I'm not going to take the children's bread. It's not right for me to take the children's bread, healing to this group, and give it over to you dogs."

And she said, "That's the truth, Lord."

164 **Faith will always admit the Word is Truth. Amen.**

See? If you got real faith, and the Bible tells you that you are doing wrong, you'll admit that you're wrong. You won't say,

"Now, wait a minute here, I belong to..." No, no, that's not faith. When the Word says it, that you... That's where you're right or wrong, is by the Word. That's right.

PERSEVERANCE\_ NY.NY V-18 N-12 SATURDAY\_ 63-1116E

168 **Remember, she had never seen a miracle.** She come out of a denomination that didn't believe in miracles. She, believing, had to come out of a denomination that said, "There is no such a thing as miracles." She was a Gentile. **She had never seen a miracle, in her life. But yet, when faith takes a hold, God is there.** See? She had never seen it, but she had heard about it.

169 If you don't believe there is miracles, read the Bible and their promises to us today. Faith took a hold.

THE.SECOND.MIRACLE\_ ERIE.PA SUNDAY\_ 51-0729E

E-30 Some people has great big faith like this, anything can happen. The next has faith that deep, takes a little longer. Next has faith that deep, takes quite a little while. Some has faith like a mustard seed. But if it's mustard seed faith, genuine faith, hold on to it; just keep believing it; it'll become marble faith; then it'll become grapefruit faith; and then it'll become mountain faith. It'll bring you right out if you just stay with it. Hold on to it; it'll bring you right straight to the light, if you'll stay with it.

**But don't be discouraged. And do not believe symptoms. Symptoms, that's the devils lie.....**

PERFECT.STRENGTH.BY.PERFECT.WEAKNESS\_ JEFF.IN V-8 N-1 SUNDAY\_ 61-1119

118 **Here's something to console us. Here's something that encourages.** Out of weakness and humility God chooses the people to build His Kingdom out of. If we ever get to heaven, if we ever stand in the Presence of God with His Church, **we'll stand in a bunch of people that's been weak and rejected and cast out by the world, and know-it-nothings.**

Isn't it strange that God likened us to sheep? A sheep is the most helpless thing there is. There's nothing so insufficient of defense than the sheep. A rabbit can run; a squirrel can get in a tree; a

dog can bite; a lion can tear; a horse can kick; a bird can fly; but a sheep stands helpless. **That's the way God wants us. Realize that we are totally insufficient, then God takes that person and begins to mold Himself into that person:** make his hands do what God would have hands to do, make his lips speak what God's lips would speak; because they're not his; they're God's. **He begins to build a character, begins to take this weakness and to make His Ownself.**

PERFECT.STRENGTH.BY.PERFECT.WEAKNESS\_ JEFF.IN V-8 N-1  
SUNDAY\_ 61-1119

121.....Cain's children become smart, shrewd, educated, great men, builders, professional men. **But God's side was weak and humble. That's how God used them.** That's God's opportunity. That's God's way of getting to us, **is when we're weak.** We get something then.

**This encourages, of course, 'cause God's whole Kingdom is built out of these kind of people.** Then when you get to that kind of a way then you--you can--you're in His Kingdom.

**The case is, with us, that, not that we are too weak, the case is we're too strong.** We're--we're--we're just too strong. That's all. **The thing of it is we're too strong-headed.** That's right. We're too strong in our head. We know too much. God wants to get that out of us. **That's right. We're too strong; we're too strong to yield to Him.....**
